

FENG SHUI IN YOUR OFFICE

HOW TO DRAW *QI* OR LIFE FORCE INTO YOUR OFFICE AND KEEP IT CIRCULATING FOR HEALTH AND PROSPERITY.

Fengshui is all about finding and harnessing energy, or *qi*. Consultants and practitioners of *fengshui* such as Adelina Pang of Adelina Pang Fengshui Consultancy adhere to classical *fengshui* principles, believing that different people experience different levels of positive and negative *qi* in their working places.

In the office or place of business, it is important to remember that *fengshui* can bring many benefits, whether you are starting a new business, planning to renovate your property, restructuring your business, or seeking opportunities to grow and expand.

With the right *fengshui*, *qi* can be harnessed to have long-term effects on you and your colleagues and employees. These effects can range from a more positive and conducive work environment, increased productivity and improved workflow, to the ushering in of new business opportunities, better

management decisions and more strongly aligned business directions.

How it's done

In order to create the best *fengshui* in your office, deeper readings need to be done. A *fengshui* site survey is conducted, along with advice on the overall layout plan of your office. The interior of the property is analysed, and recommendations made about the most favourable directions and locations, with recommendations for changes that need to be made in order to reduce *qi* deficits and harness more *qi*.

Favourable dates and times are recommended for these changes to be made. Along the way, the client's birth data is analysed and a natal chart constructed, to ensure that your personal *qi* is in alignment with that of the office. Once all these steps have been taken, they are reviewed and a summary report provided.

By matching personal attributes with

ancient calculation methods, *fengshui* masters apply appropriate principles in their solutions to maximise positive energies within ourselves and the environment around us.
